Re: Environmental Assessment and Master Stillities System Plan for CIA Master Development Plan (NCPT)

Dear thurlin:

We have reviewed the above-reference! doc sense and often the following comments:

- We share the concern expressed by the Council on the Environment and State Health Department regarding sewaye (Council's letter, dated December 18, 1981).
- 2. We found the EA to be too general in addressing the water quality impacts (runoff and dewatering) of the proposal; however, implementation of the improvements and practices described on pages 90-92 of the Utilities Plan should
  greatly reduce the hompoint source pollution potential of the project.
- 3. EA. Page 33, Figure 3 Alternative Evaluation Matrix. We do not agree with the evaluation of Alternative C. We view the impacts to Environmental Element 1.1 under Alternative C as being negative, and we feel that the text supports this view.

Thank you for the opportunity to comment on these documents. If we may be of further assistance, please don't hesitate to call on us.

Sincerely,

Trum

Brian D. Harrison Pollution Control Specialist Bureau of Surveillance & Field Studies
